VINITA SONAKIYA

PYTHON DEVELOPER

ABOUT ME

I am detail-oriented and highly motivated Computer Science Engineering graduate with expertise in web development using Django. Seeking an entry-level position to leverage strong Python and Django skills, as well as a solid foundation in computer science, to contribute effectively to web development projects.

PROJECTS

Blood Donor Management System (Python, Django):

Web Developer

- Designed and implemented a Django-based web application to manage information about blood donors.
- Implemented features for adding new donors to the system, maintaining donor profiles with details such as blood type, contact information, and donation history.
- Enhanced the user interface for a seamless and user-friendly experience, encouraging more individuals to register as blood donors.
- Utilized Django's MVC architecture for efficient data management and seamless functionality.

Personal Portfolio Website (Django, HTML, CSS):

Web Developer

- Created a responsive and visually appealing personal portfolio website using Django, showcasing proficiency in front-end and back-end development.
